

Video Wall Client

FEATURES

More Video Wall can be installed in the same system.

More clients can connect to one Video Wall at the same time.

In case of incident a larger view allows for easier observation.

The Video Wall is remotely controlled by dragging and dropping camera images from the client dashboard.

The images are automatically resized depending on how many are displayed.

The 200, 400, 600 MP panoramic images can also be displayed on the Video Wall in proportion with the other images.

The Picture-in-Picture function is also available.

Remote zoom makes it possible for clients to zoom on images at the Video Wall.
